YOUSSEF YASSER

Full Stack Web Developer

+20 110 469 9278 | Giza, Egypt | yassefsea274@gmail.com | GitHub | LinkedIn | Portfolio

SUMMARY

Computer Science student and Full Stack Web Developer with a solid foundation in web development, API design, and database systems. Proficient in JavaScript/TypeScript and modern frontend and backend technologies, with an interest in reliable software and AI applications.

SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js (App Router), Tailwind CSS, Framer Motion, Leaflet.js, RTL/Arabic UI

Backend: Node.js, Express.js, REST API Design, JWT Authentication, MVC, Input Validation

Databases: PostgreSQL, MySQL, Redis (Distributed Locking), PostGIS, Geospatial Queries, Schema Design

Tools: Git/GitHub, Docker, AWS (basic), Postman, Cloudinary, Google Gemini API, npm, VS Code

WORK EXPERIENCE

IT Intern | GUPCO (Gulf of Suez Petroleum Company), Egypt | Sep 2025 - Oct 2025

- Selected for an IT internship at a major petroleum enterprise, gaining exposure to backend development, database architecture, and enterprise infrastructure workflows.

EDUCATION

B.Sc. Computer Science & Information | Minufiya University, Menouf, Egypt | Jan 2023 - Jan 2027

PROJECTS

Food Delivery Platform | *Next.js, React, TypeScript, Node.js, Express.js, MySQL* Live Demo

- Built a full-stack delivery platform with customer, restaurant, and admin roles using JWT authentication and role-based access control.
- Developed 30+ REST APIs for orders, cart, payments, dishes, and vendor operations; added MySQL geospatial queries (SPATIAL INDEX) for nearby-restaurant discovery.
- Created an Arabic RTL Next.js frontend with Leaflet maps, Framer Motion animations, and real-time order tracking.

Senter SaaS - Educational Centers Platform | *Node.js, Express.js, PostgreSQL, PostGIS, Cloudinary* Live Demo

- Designed a SaaS backend for students, teachers, centers, sessions, bookings, attendance, and wallets across four user roles.
- Built booking workflows with capacity validation, wallet payments, QR-based attendance, and automated refunds.
- Designed PostgreSQL schemas with PostGIS geo-queries and pg_trgm fuzzy search, secured with JWT role-based authorization.

WealthWise AI - Smart Digital Wallet | *Node.js, Express.js, PostgreSQL, Redis, Google Gemini* Live Demo

- Built an AI-powered wallet that converts Arabic/English natural-language spending descriptions into structured transactions using Google Gemini.
- Implemented ACID-compliant transfers using PostgreSQL SERIALIZABLE isolation and Redis distributed locks with idempotency keys to prevent duplicate operations.
- Generated financial insights by analyzing spending patterns against monthly budgets.
