

YOUSSEF YASSER

Junior Full Stack Web Developer

+20 110 469 9278 | Giza, Egypt | yassefsea274@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Junior Full Stack Developer with a proven track record of designing and shipping production-ready applications, including an AI-powered fintech wallet with ACID-compliant transactions and distributed locking, a geospatial food delivery platform with 30+ REST API endpoints, and a multi-role SaaS platform for educational centers. Strong focus on backend architecture, database design, and scalable system design using Node.js, Express.js, PostgreSQL, MySQL, Redis, and TypeScript/JavaScript.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, SQL
- **Frontend:** React.js, Next.js (App Router), Tailwind CSS, Framer Motion, Leaflet.js, RTL/Arabic UI
- **Backend:** Node.js, Express.js, REST API Design, JWT Authentication, MVC, Input Validation
- **Databases:** PostgreSQL, MySQL, Redis (Distributed Locking), PostGIS, Geospatial Queries, Schema Design
- **Tools & Other:** Git, GitHub, Docker, AWS (basic), Postman, Cloudinary, Google Gemini API, npm, VS Code

WORK EXPERIENCE

IT Intern — GUPCO (Gulf of Suez Petroleum Company), Egypt

Sep 2025 – Oct 2025

- Selected for an IT internship at a major petroleum enterprise, gaining exposure to backend development, database architecture, and enterprise infrastructure workflows.

EDUCATION

B.Sc. Computer Science & Information — Minufiya University, Menouf, Egypt

Jan 2023 – Jan 2027

PROJECTS

Food Delivery Platform | *Next.js, React, TypeScript, Node.js, Express.js, MySQL*

[Live Demo](#)

- Built a full-stack food delivery platform with customer, restaurant, and admin roles using JWT authentication and role-based access control.
- Developed 30+ REST APIs covering orders, cart, payments, dishes, and vendor operations; implemented MySQL geospatial queries (SPATIAL INDEX) for nearby-restaurant discovery.
- Delivered an RTL Arabic Next.js frontend with Leaflet maps, Framer Motion animations, and real-time order tracking.

Senter SaaS — Educational Centers Platform | *Node.js, Express.js, PostgreSQL, PostGIS, Cloudinary* [Live Demo](#)

- Designed a SaaS backend managing students, teachers, centers, sessions, bookings, attendance, and wallets across 4 user roles.
- Built session-booking workflows with capacity validation, wallet payments, QR-based attendance, and automated refunds.
- Designed a relational PostgreSQL schema with PostGIS geo-queries and pg_trgm fuzzy search, secured with JWT role-based authorization.

WealthWise AI — Smart Digital Wallet | *Node.js, Express.js, PostgreSQL, Redis, Google Gemini* [Live Demo](#)

- Built an AI-powered wallet that parses Arabic/English natural-language spending descriptions into structured transactions via Google Gemini.
- Implemented ACID-compliant transfers using PostgreSQL SERIALIZABLE isolation and Redis distributed locks with idempotency keys to prevent duplicate operations.
- Delivered AI-generated financial advice by analyzing spending patterns against monthly budgets.
